

TIA/EIA-568-A Wiring Standard

T568B

T568B Plug Wiring

T568B Pair Assignment

The TIA/EIA-568A standard specifies two wiring schemes to be employed in Category 3-5 and Category 5e UTP installations. The difference between the T568A and T568B schemes is that pairs 2 and 3 are reversed.

T568A

T568A Plug Wiring

T568A Pair Assignment

Although 10Base-T only needs two pair, all four pairs must be terminated in either the T568A or T568B scheme. The T568B scheme is the most popular.

The color scheme should be consistent throughout the system. T568A or T568B pair assignments may be used interchangeably provided that both ends are terminated at the same pin/pair scheme. The new 100Base-TX (IEEE 802.3) uses the same wiring scheme as 10Base-T (pairs 2 and 3) over Category 5 and Category 5e UTP.

UTP Color Codes

Pair 1	White-Blue (W-BL) Blue (BL)
Pair 2	White-Orange (W-O) Orange (O)
Pair 3	White-Green (W-G) Green (G)
Pair 4	White-Brown (W-BR) Brown (BR)
